

Boom Boom Spray Product Sheet.

Boom Boom Spray

100% organic and vegetal plant biostimulant

Contains 100% natural amino acids, peptides, glucides and minerals.

Boom Boom Spray works in three ways:

Anti-stress agent: it helps plants to overcome stress caused by extreme cold, extreme heat, low light levels, dehydration, or draught.

Nutritional additive: it gives the plant a nitrogen boost which produces shiny, dark green leaves, especially in the initial growth stage. This greatly increases the photosynthetic capacity of the plant.

Booster function: stimulates productivity, plant growth and absorption of minerals.

Boom Boom Spray is absorbed very rapidly by the leaves. Effects can be seen within hours after application. Boom Boom spray can be used with any fertilizer programs: biological, bio-mineral or chemical. Can be used for cultures in soil, coco and hydroponics.

Composition:

Organic matter 45%

Organic nitrogen (N) 5%

Soluble peptides and plant amino acids 30%

Glucides 10%

Instructions for use: Dillute 5ml Boom Boom Spray in 1 liter of water.

For indoor use: Spray the plants until dripping wet with a solution of 5 ml per liter of water. Preferably do this just after the lights go on.

For outdoor use: Spray the plants early in the morning.

- mother plants: Spray the plants 2 days before you make cuttings.
- cuttings: Spray the cuttings two days after they are rooted.
- Repotting: Spray the plants immediately after they are transplanted.
- production plants: Spray the plants once during the growth period. Once in week 1 of flowering and once in week 2 of flowering.
- stressed plants. Spray plants once and if necessary, repeat once more after 5 days.

Do not overdose.

Prepared solution should be used within 6 hours. After use, plant sprayer should be rinsed thoroughly.

Boom Boom Spray is safe for plants, animals and humans.

Store in a cool and dry place. Keep out of reach of children.

Not suitable for consumption.

In accordance with EU regulation 889/2008, Boom Boom Spray may be used in organic farming. Organic input Control Union and OMRI certified.
